**Brucella Canis Antibody Screen - IFA**  
Final - Approved 10/02/2013 1:29PM

Abaxis Laboratory SID: 13100101249  
Collected: 10/01/2013 1:13PM

TEST

NORMAL

ABNORMAL

BRUC CANIS IFA

Negative(<1:100)

Interpretive Summary:

- \* Titers less than 1:100 are considered negative.
- \* Titers of 1:100 are considered suspect.
- \* Titers of 1:200 are considered positive for canine Brucellosis.
- \* As with any Brucella canis screening test, all positive and suspected positive results should be confirmed by an alternative method such as AGID, PCR, or culture.
